Campaign Comparison

CAMPAIGN 1

KubeCon '23

Total Dials	740
Answered	39
Follow-ups	11
Meetings	2
Connect Rate	~5.3%

CAMPAIGN 2 · BEST PERFORMER

DevOps Live London – Cold Outbound

Total Dials	199
Answered	28
Follow-ups	11
Meetings	3
Connect Rate	~14.1% ↑

Takeaway: Campaign 2 delivers **~3× higher connect rate** and more meetings with significantly lower volume — strong indication of better audience relevance and timing.

Key Insight

Most important signal this period

- Conversations are **longer and more engaged**
- Prospects are **more willing to continue and book meetings**
- The system is not just generating conversations — it is now generating **pipeline signals (meetings)**

FRICTION POINTS TO ADDRESS

- AI objection still exists as a friction point
- Some disconnects are directly tied to **AI disclosure timing**

Direction Forward

1

Scale volume on current campaign

Continue scaling DevOps Live London outbound

2

Refine AI disclosure handling

Optimize timing and phrasing of AI disclosure

3

Focus on decision-makers

Keep optimizing for decision-maker conversations

4

Maintain follow-up momentum

Strong conversion already visible — keep pushing
